Notes for 2016-17 Turf Paradise Meet:

1. Be advised that in the event urine is not obtained from a horse, those drugs with urine-only thresholds will have an effective threshold of the limit of detection for the respective drug in blood utilizing mass spectral methods.

2. Horses that test above the 25 ppb threshold for cobalt but below 50 ppb will be placed on the Veterinarian's List and will be ineligible to be entered until the horse test below 25 ppb. Horses testing above 50 ppb will result in a Class B penalty.

3. Please note that some of the listed thresholds apply to the metabolite of the drug. All drugs are listed by the parent drug, however, for the sake of clarity.

4. Note above: RMTC 03/16 refers to ARCI Controlled Therapeutic Medication Schedule for Horses – Version 3.0 Revised – March 25, 2016

5. Note above: RULES 03/16 refers to ARCI Model Rules of Racing Version 6.2 Mar 24, 2016
